

Python Basic Interview Questions – 5

1. What is the use of range() in Python?

Answer: range() is used to generate a sequence of numbers.

Example: range(1, 6) gives numbers from 1 to 5.

2. What is a for loop?

Answer: A for loop is used to repeat code for each item in a sequence.

3. What is a while loop?

Answer: A while loop repeats code as long as a condition is true.

4. What is the use of break in Python?

Answer: break is used to stop a loop immediately.

5. What is the use of continue in Python?

Answer: continue skips the current iteration and moves to the next iteration.

Example for Question 2:

```
for i in range(5):  
    print(i)
```
